

Phase 8: Deployment Readiness - Test Summary

Thursday, 20 August 2026 23:59

Testing with scripts:

Install dependencies from PowerShell:

python -m pip install requests python-dotenv

Run the tests:

python deployment_test.py

View the evidence file:

Get-Content ..\logs\phase8_test_results.jsonl

```
deployment > logs > {} phase8_test_results.jsonl
1 {"timestamp_utc": "2026-08-22T19:02:30.225978+00:00", "test_id": "P8-01", "category": "rag_success", "query": "What is your return policy?", "latency_ms": 5148.52, "http_status": 200, "expected": "Returns return policy"}

```

Test Langflow unavailability:

In powershell:

docker compose stop langflow

python test_graceful_failure.py --expect-unavailable

```
PS C:\envs\AI-CustomerSupportAgent\Phase8\AI_Customer_Support_Capstone\deployment> python .\test\test_graceful_failure.py --expect-unavailable
Phase 8 - Graceful Failure Tests
Results file: C:\envs\AI-CustomerSupportAgent\Phase8\AI_Customer_Support_Capstone\deployment\logs\graceful_failure_results.jsonl

GF-06 | PASS | 4068.52 ms | HTTP None | Langflow unavailable
Controlled error: Langflow service is unavailable.
PS C:\envs\AI-CustomerSupportAgent\Phase8\AI_Customer_Support_Capstone\deployment>
```

Restart Langflow:

docker compose start langflow

Check Recovery:

docker compose ps

Invoke-RestMethod http://localhost:7860/health_check

```
PS C:\envs\AI-CustomerSupportAgent\Phase8\AI_Customer_Support_Capstone\deployment> docker compose ps
NAME                IMAGE                COMMAND              SERVICE  CREATED      STATUS      PORTS
